Project	Old Doha Port Project – Mina District Apartments (Buildings 29, 36 & 46)
Subject	Design Verification & FCU Selection – Resolution of Cooling Issues in (Buildings 29, 36 & 46)

Dear Mr. Youssef,

With reference to your enquiry and our telephone discussion regarding the cooling issues reported across three (3) apartments at the Old Doha Port – Mina District Apartments (Buildings 29, 36 and 46), we thank you for inviting Metri Engineering Services W.L.L. (MES) to submit our offer. We have reviewed the as-built HVAC equipment schedules provided (Drawing Nos. DPP-DQ1-D-MDA-C-AC-AL-29-6000, DPP-DQ1-D-MDA-C-AC-AL-36-6000 and DPP-DQ1-D-MDA-C-AC-03-46-6000, Daikin FCUs) and are pleased to submit our quotation for the design verification and FCU selection review as detailed below.

1. Scope of Work

1. Site Assessment & Measurements: Carry out a detailed site assessment of the apartments in (Buildings 29, 36 & 46), including measurement of chilled water flow rates and supply/return water temperatures (in/out) at each fan coil unit DRV & the main DRV, together with air-side readings as required. All measured values shall be compared against the as-built design schedules to identify any deviations, and any deficiencies shall be highlighted.
2. Design Verification: Review the existing design and FCU selections (cooling capacities, air flows, ESP and chilled water parameters) against the actual site measurements and prevailing operating conditions, to verify the adequacy of the installed units and confirm whether the existing FCUs are undersized for the applied loads.
3. Findings Report: Prepare and submit a report presenting all site measurements, comparison with the as-built design data, identified deviations and deficiencies, and our engineering conclusions on the root cause(s) of the cooling issues.
4. Technical & Commercial Proposal: Prepare and submit a technical and commercial proposal for the recommended modifications and improvements (e.g., FCU replacement/upsizing, hydronic balancing or other corrective measures) required to resolve the cooling issues.

2. Commercial Offer

Item	Description	Unit	Amount (QAR)
1	Design verification, site assessment & measurements, FCU selection review, findings report, and technical & commercial proposal for remedial works – three (3) apartments at Old Doha Port (Buildings 29, 36 & 46)	Lump Sum	10,000.00
TOTAL LUMP SUM PRICE			QAR 10,000.00

Amount in words: Qatari Riyals Ten Thousand Only.

3. Payment Terms

Milestone	Payment
Advance payment upon issuance of Purchase Order / signed quotation	50%
Against submission of the findings report and the technical & commercial proposal	50%

4. Terms & Conditions

- Quotation validity: thirty (30) days from the date of this offer.
- Duration: site assessment and measurements to be completed within 5–7 working days from receipt of the Purchase Order and site access; final report and proposal to follow within 10 working days thereafter.
- The Client shall provide free and safe access to the apartments, ceiling voids and FCUs, and shall make available the relevant as-built drawings and O&M documentation.
- The chilled water plant / district cooling supply shall be operational during the assessment; measurements are subject to prevailing plant operating conditions.
- The above price covers assessment, measurement and reporting services only; supply and installation of any equipment or remedial works are excluded and shall be quoted separately under the technical & commercial proposal.
- Any additional apartments, buildings or scope beyond the above shall be subject to a separate agreement.

We trust the above meets your requirements and look forward to receiving your valued confirmation. Should you require any clarification, please do not hesitate to contact us.

Yours faithfully,

For Metri Engineering Services W.L.L.

Eng. Fayeze 55572793
