

TECHNICAL & COMMERCIAL PROPOSAL

Annual Maintenance Contract (AMC)

for

Air Conditioning Systems

(Split Wall-Mounted, Ceiling-Mounted, Ductable & Window Type Units)

Submitted To:	Al Jeryan Holding Investment (JHI)
Attention:	Mr. Mohammed Abdullah Al Maraghi – General Manager
RFQ Reference:	JHI/2026/001 Dated 10.05.2026
MES Reference:	MES/PROP/2026/JHI-AMC-199
Date:	18 May 2026

CONFIDENTIAL

This document is proprietary to Metri Engineering Services W.L.L. and is submitted solely for the purpose of responding to the above-referenced RFQ. It shall not be disclosed, reproduced, or used for any other purpose without prior written consent.

1. INTRODUCTION & EXECUTIVE SUMMARY

Metri Engineering Services W.L.L. (MES), is pleased to submit this Technical and Commercial Proposal in response to the Request for Quotation (RFQ) Reference No. JHI/2026/001 dated 10 May 2026 issued by **Al Jeryan Holding Investment (JHI)** for the provision of an Annual Maintenance Contract (AMC) covering standalone air conditioning systems across thirteen (13) residential properties in various locations throughout the State of Qatar.

This proposal covers the full scope of Planned Preventive Maintenance (PPM), Reactive Maintenance, and Emergency Call-Out Services for approximately 1,021 standalone AC units of mixed types and manufacturers, including Split Wall-Mounted, Ceiling-Mounted, Ductable, and Window Type Units.

Our proposal is structured to address both the technical and commercial requirements set forth in the RFQ while incorporating essential provisions to ensure the long-term effectiveness, transparency, and mutual benefit of the contractual relationship.

2. SCOPE OF CONTRACT

2.1 Contract Overview

Contract Type	Annual Maintenance Contract (AMC)
Contract Duration	Three (3) Years from Contract Effective Date
PPM Frequency	Two (2) Planned Preventive Maintenance visits per year per unit
Covered Systems	Split Wall-Mounted, Ceiling-Mounted, Ductable, and Window Type AC Units
Approximate Unit Count	1,021 units across 13 sites (subject to verification during Condition Assessment)

2.2 Service Locations

The scope covers the following sites owned and/or managed by JHI:

S/N	Site Description	Approx. Qty
1	Old Airport – Building 33 (9 Apartments & Common Area)	30
2	Al Mamoura – 6 Villas Compound	50
3	Al Mamoura – 8 Villas Compound	66
4	Al Mamoura – 10 Villas Compound	80
5	Al Messila – 6 Villas Compound	50
6	Al Messila – 16 Villas Compound	100
7	Madinat Khalifa – Building 05 (10 Apartments & Common Area)	40
8	Fereej Qulaib – Building 13 (12 Apartments & Common Area)	42
9	Al Kharaitiyat – 10 Villas Compound	82
10	Al Kharaitiyat – 24 Villas Compound	170
11	Umm Salal Ali – Building 26 (10 Apartments & Common Area)	60

12	Umm Qarn – 12 Villas	108
13	Umm Qarn – 11 Villas	143
	Total Approximate Quantity	1,021

Note: The final unit count shall be confirmed during the Condition Assessment (Section 3). Any additional buildings or villas to be included in the scope in the future shall be subject to mutual written agreement and pricing adjustment.

3. PRE-COMMENCEMENT CONDITION ASSESSMENT

This section constitutes a critical pre-condition to the commencement of PPM services under this Contract.

3.1 Purpose

Upon execution of the Contract, the Contractor shall carry out a comprehensive Condition Assessment of all air conditioning units covered under this Contract, prior to the commencement of any Planned Preventive Maintenance (PPM) services. The purpose of this assessment is to:

- Establish the actual quantity, type, capacity, brand, model, and installed location of each AC unit.
- Assess the current operating condition, serviceability, and general state of each unit.
- Identify any pre-existing faults, deficiencies, damage, or equipment requiring repair or replacement.
- Create a baseline equipment register (Asset Register) that will serve as the reference document for the duration of the Contract.

3.2 Assessment Procedure

The Condition Assessment shall be conducted within thirty (30) calendar days from the Contract Effective Date. The Contractor shall coordinate with the Client to arrange access to all units. The assessment shall include visual inspection, operational testing, electrical checks, refrigerant pressure readings, and airflow verification for each unit.

3.3 Assessment Report & Deficiency List

Upon completion, the Contractor shall submit a detailed Condition Assessment Report to the Client, which shall include:

- A complete Asset Register listing all units with their identification details, capacity, condition rating, and location.
- A Deficiency List identifying all units and/or components found to require repair or replacement prior to or outside the scope of regular PPM services.
- Recommended corrective actions, estimated costs, and priority classification for each deficiency item.

3.4 Client Approval & Separate Charging

All repairs, replacements, and corrective works identified in the Deficiency List shall be **quoted and charged separately** from the AMC Contract price and shall be executed only upon prior written approval from the Client. Such works are expressly **excluded** from the scope and pricing of this Annual Maintenance Contract.

The Contractor shall not be held responsible under the AMC warranty provisions for the failure, malfunction, or deterioration of any equipment or component identified in the Deficiency List that remains unrepaired or unreplaced following the Client's decision not to proceed with the recommended corrective works.

3.5 Commencement of PPM

Regular Planned Preventive Maintenance services shall commence only after the Condition Assessment Report and Asset Register have been submitted to and acknowledged by the Client. The PPM schedule shall be based on the verified unit count and site conditions established during the assessment.

4. PLANNED PREVENTIVE MAINTENANCE (PPM)

4.1 Scope of PPM Services

Planned Preventive Maintenance shall be carried out twice (2) per year per unit and shall include the following activities as a minimum:

- Cleaning of air filters.
- Chemical or water-jet cleaning of evaporator and condenser coils.
- Inspection and cleaning of blower wheels, fan blades, and fan motors.
- Inspection and cleaning of drain trays, drain lines, and condensate drain systems.
- Inspection and tightening of all electrical connections, terminals, and contactors.
- Testing of thermostats and control systems.
- Checking of refrigerant pressures (suction and discharge) and topping up to normal operating levels where required.
- Visual inspection of piping insulation, refrigerant lines, and outdoor unit condition.
- General operational testing and performance verification.
- Lubrication of moving parts where applicable.

4.2 PPM Scheduling & Coordination

The Contractor shall prepare a detailed PPM schedule covering all sites and units for each service cycle and shall submit it to the Client for approval at least fifteen (15) calendar days prior to the start of each PPM cycle. All scheduled PPM visits shall be coordinated with the Client in advance. Access to occupied villas and apartments shall be arranged in coordination with the Client and/or their tenant, with a minimum of forty-eight (48) hours' prior notice to the tenant.

The Contractor shall make all reasonable efforts to minimize disruption to tenants and shall carry out PPM works during normal working hours (Saturday to Thursday, 8:00 AM to 5:00 PM) unless otherwise agreed with the Client.

4.3 Tools, Equipment & PPE

The Contractor shall provide all required tools, AC cleaning kits, brazing/welding equipment with necessary gases, testing and measurement equipment, appropriate Personal Protective Equipment (PPE), access equipment (ladders, scaffolding), and all necessary communication devices at its own cost. These are included in the AMC unit rate.

5. INCLUDED ITEMS & EXCLUSIONS

5.1 Items Included in the AMC Price

The following spare parts, consumables, and services are included in the AMC unit rate and shall be provided at no additional cost to the Client:

- **Minor Spare Parts:** Capacitors (run and start), electrical wires, connectors, cable lugs, capillary tubes, flare nuts, service valves, filter driers, thermostat batteries, and similar minor components.
- **Consumables:** Grease, lubricating oil, paint (touch-up), electrical tape, piping insulation tape, duct tape, foam sealant, waterproof sealant, screws, brackets, cleaning chemicals, coil cleaner, and similar maintenance consumables.
- **Refrigerant Topping-Up:** Checking and topping up of refrigerant to normal operating levels during PPM visits. This covers minor refrigerant top-up only, not a full system recharge.
- **Welding Gases:** Brazing and welding gases required for minor pipework repairs during maintenance.
- **Manpower, Tools & Transportation:** All labor, supervision, tools, equipment, vehicles, and logistics required for the execution of PPM and included reactive maintenance.

5.2 Items Expressly Excluded from the AMC Price

The following items and works are expressly excluded from the scope and pricing of this AMC and shall be carried out only upon prior written approval from the Client, quoted and charged separately on a case-by-case basis:

- Compressors (all types).
- Air Filters.
- Condenser coils and evaporator coils.
- Fan motors, blower motors, and condenser fan motors.
- Rotors and fan blades.
- Printed circuit boards (PCBs) and control boards.
- Complete refrigerant recovery and full system recharge.

- Expansion valves and thermostatic expansion valves (TXVs).
- Remote controllers and display panels.
- Copper piping, drain piping, and major insulation replacement.
- Major leak rectification and the required refrigerant charge.
- Replacement of entire AC units (indoor, outdoor, or complete systems).
- System modifications, alterations, upgrades, capacity enhancements, or redesign works.
- Structural, civil, or electrical works beyond the AC system boundary.
- Any repairs or replacements identified during the Condition Assessment (Section 3).

6. REACTIVE MAINTENANCE

6.1 Definition

Reactive Maintenance under this Contract is defined as unscheduled maintenance required to diagnose and rectify faults, malfunctions, or performance issues in the air conditioning units covered under this Contract, where the fault relates to items included within the AMC scope (Section 5.1).

For clarity: Reactive maintenance shall apply **only** to faults that can be rectified using the included minor spare parts and consumables listed in Section 5.1. Where a reactive call reveals that the fault requires an excluded spare part or major repair (as listed in Section 5.2), the reactive call shall be reclassified as a **Corrective Maintenance** requirement, and the Contractor shall submit a separate quotation for the Client's approval before proceeding.

6.2 Warranty-Period Reactive Maintenance (Included)

All reactive maintenance complaints reported within one (1) month following the completion of each PPM visit, where the fault relates to items within the AMC-included scope (Section 5.1), shall be attended to and rectified at no additional cost to the Client. This warranty covers workmanship-related defects and faults attributable to the included scope only.

Exclusion: Faults arising from pre-existing conditions identified in the Condition Assessment Deficiency List (Section 3.3), faults requiring excluded spare parts (Section 5.2), tenant misuse, vandalism, water damage, power surges, or force majeure events are excluded from this warranty.

6.3 Chargeable Reactive Maintenance (Post-Warranty Period)

Upon expiration of the one (1) month PPM warranty period, reactive maintenance requests for faults within the AMC-included scope shall be treated as chargeable calls in accordance with the rates stipulated in the Commercial Proposal (Section 10).

6.4 Corrective Maintenance (Excluded Items)

Any reactive call that upon diagnosis reveals a requirement for excluded spare parts, major component replacement, or works outside the AMC scope (Section 5.2) shall be treated as Corrective Maintenance. The Contractor shall:

- Diagnose the fault and provide a written report to the Client.

- b) Submit a separate quotation for the required corrective works, including parts and labor.
- c) Proceed with corrective works only upon receipt of prior written approval from the Client.

Corrective Maintenance quotations shall be priced on a case-by-case basis, depending on the nature of the task, required materials, and manpower. These are expressly excluded from the AMC pricing structure.

7. RESPONSE TIMES & WORKING HOURS

7.1 Normal Working Hours

Normal working hours for the purposes of this Contract are defined as Saturday to Thursday, 8:00 AM to 5:00 PM. Friday is a non-working day.

7.2 Response Time for Reactive Maintenance

The Contractor shall respond to reactive maintenance requests during normal working hours as follows:

Activity	Response Time
Acknowledgment of complaint	Within one (1) hour of notification
Attendance at site	Within three (3) hours of notification

Complaints received outside normal working hours (after 5:00 PM, on Fridays, or on public holidays) shall be acknowledged on the next working day and attended to accordingly, unless the complaint is classified as an emergency call-out.

7.3 Emergency Call-Out Service

The Contractor shall provide an emergency call-out service for urgent AC failures outside normal working hours. Emergency call-outs shall be charged at the rate specified in the Commercial Proposal (Section 10). The emergency call-out charge covers attendance and diagnostic labor only; any spare parts, materials, or additional repairs required shall be quoted and charged separately.

8. MANPOWER & PERSONNEL

All personnel deployed under this Contract shall be direct employees of the Contractor and under the Contractor's valid company sponsorship in the State of Qatar. The Contractor shall deploy suitably qualified and experienced HVAC technicians, supervised by a designated Project Supervisor who shall serve as the primary point of contact with the Client.

The Contractor shall notify the Client of any personnel changes due to resignation, illness, or other legitimate operational reasons within five (5) working days and shall ensure replacement personnel of equivalent or higher qualification are deployed without disruption to the service schedule.

All deployed personnel shall wear the Contractor's company uniform and carry valid company identification at all times while on site.

9. REPORTING & DOCUMENTATION

The Contractor shall submit detailed service reports for each PPM visit and reactive/corrective maintenance visit, including service details, readings, observations, actions taken, and before-and-after photographs if required. All service reports shall be duly signed by the client or client representative at each site confirmation of service completion on the same visit day.

PPM completion reports shall be submitted within seven (7) calendar days following the completion of each PPM cycle for each site. Reactive and corrective maintenance reports shall be submitted within three (3) working days of service completion.

A summary report shall be provided to the Client, covering all PPM, reactive, corrective, and emergency activities performed during the preceding month.

10. COMMERCIAL PROPOSAL

10.1 Pricing Summary

S/N	Description	Unit	Rate (QAR)	QTY	TOTAL/Year
1	AMC Unit Rate (per AC unit per year) – Inclusive of 2 PPM visits, included spare parts, consumables, and warranty-period reactive maintenance	QAR / Unit / Year	300	1,021	306,300
2	Reactive Maintenance Call-Out Charge (post-warranty period, per complaint, for AMC-included scope faults only)	QAR / Complaint	300		
3	Emergency Call-Out Charge (outside working hours, per visit, attendance and diagnosis only – parts/repairs excluded)	QAR / Visit	200		
4	Major Spare Parts & Corrective Maintenance (excluded items per Section 5.2)	Per Quotation	To be quoted separately		

Total Price for 1 year (1,021 units) = 306,300 Q.R.

Notes: The AMC unit rate (Item 1) is inclusive of all manpower, tools, equipment, transportation, included minor spare parts, consumables, supervision, reporting, and compliance with contractual obligations as described in this proposal. The Emergency Call-Out Charge (Item 3) covers attendance, diagnostic labor, and initial assessment only. Any spare parts, materials, or repair works identified during the emergency call-out shall be quoted and charged separately.

10.2 Material Markup

A material markup of ten percent (10%) shall be applicable on all materials procured for works outside the AMC-included scope (corrective maintenance, excluded repairs, and additional works). The Contractor shall submit the original supplier purchase invoice for each material item as supporting documentation.

No cumulative, hidden, or additional markups shall be permitted beyond the stated percentage.

Clarification: Corrective Maintenance works involving excluded spare parts and major repairs (Section 5.2) shall be quoted on a case-by-case basis. Such quotations shall include material costs (plus the 10% markup), labor, and any specialized equipment required. These quotations are independent of the AMC pricing structure and shall be subject to separate Client approval.

10.3 Payment Terms

Invoices shall be submitted upon completion of each PPM service cycle, supported by duly signed service reports by client or his representative in each site.

Payment shall be made within thirty (30) days from the date of invoice submission.

The Client shall raise any objections or disputes regarding an invoice within seven (7) calendar days from the date of receipt. If no written objection is raised within this seven (7) day period, the invoice shall be deemed approved and payment shall become due.

Invoices for corrective maintenance and additional works shall be submitted separately, supported by the approved work order, signed service report, delivery notes, material invoices, and applicable documents.

10.4 Price Validity

All quoted prices shall remain valid for a period of forty-five (45) days from the date of submission. The AMC unit rate shall remain fixed for the first year of the Contract. An annual price review shall be conducted prior to each subsequent contract year, and any adjustment shall be mutually agreed in writing.

11. COMPLIANCE & LIABILITY

All services shall be performed in strict compliance with the original equipment manufacturer (OEM) recommendations, recognized industry best practices, and all applicable laws, regulations, codes, and safety requirements in force within the State of Qatar.

The Contractor shall ensure proper coordination with the Client and execute all works in a manner that minimizes disruption and inconvenience to the tenants or end users.

The Contractor shall maintain proper housekeeping standards at all times, ensuring that all work areas are kept clean, safe, and orderly during and upon completion of the works, including the removal and proper disposal of all debris and waste materials.

11.1 Limitation of Liability

The Contractor's liability under this Contract shall be limited strictly to the scope of works and services performed by the Contractor. The Contractor shall be responsible for rectifying defects, damages, or losses directly caused by its own negligence, error, or omission in the performance of the contracted services.

The Contractor shall not be liable for, and shall not indemnify the Client against, any losses, damages, fines, penalties, or liabilities arising from:

- Pre-existing equipment faults or deficiencies identified in the Condition Assessment.
- Equipment failure due to age, wear and tear beyond the Contractor's control, or end-of-life conditions.
- Tenant misuse, negligence, tampering, or unauthorized modifications to AC equipment.
- Power surges, voltage fluctuations, or electrical supply issues beyond the AC system boundary.
- Force majeure events, acts of God, or circumstances beyond the reasonable control of the Contractor.
- Any matters outside the scope of this Contract.

12. TERMINATION

12.1 Termination for Convenience

Either party may terminate this Contract for any reason by providing thirty (30) calendar days' written notice to the other party. Upon such termination, the Contractor shall be entitled to payment for all services satisfactorily performed and materials delivered up to the effective date of termination.

12.2 Termination for Cause

Either party may terminate this Contract for cause if the other party commits a material breach of any term or condition of this Contract and fails to remedy such breach within fifteen (15) calendar days of receiving written notice specifying the nature of the breach and requiring its remedy.

Material breach by the Client shall include, but not be limited to, non-payment of undisputed invoices for a period exceeding sixty (60) days from the due date.

Material breach by the Contractor shall include, but not be limited to, persistent failure to perform PPM services in accordance with the agreed schedule, or abandonment of the works.

12.3 Payment Upon Termination

Upon termination for any reason, the Client shall pay the Contractor for:

- All PPM services completed and accepted prior to the effective date of termination.
- All reactive, corrective, and emergency maintenance works completed and properly documented prior to the effective date of termination.
- All materials procured and delivered with prior Client approval that have not yet been invoiced.

Payment for the above shall be made within thirty (30) days of the effective date of termination.

13. FORCE MAJEURE

Neither party shall be liable for any delay or failure to perform its obligations under this Contract where such delay or failure results from events beyond the reasonable control of the affected party, including but not limited to acts of God, natural disasters, epidemics, pandemics, war, civil unrest, government actions, or severe weather conditions. The affected party shall notify the other party in writing within seven (7) days of the occurrence of such event.

14. DISPUTE RESOLUTION

Any dispute arising out of or in connection with this Contract shall first be resolved through good-faith negotiations between the authorized representatives of both parties. If the dispute cannot be resolved through negotiation within thirty (30) days, either party may refer the matter to the competent courts of the State of Qatar, which shall have exclusive jurisdiction.

15. GENERAL PROVISIONS

This Contract shall be governed by and construed in accordance with the laws of the State of Qatar.

No amendment or modification of this Contract shall be effective unless made in writing and signed by both parties.

This proposal supersedes all prior discussions, representations, and agreements between the parties relating to its subject matter.

All communications and notices under this Contract shall be in writing and delivered by email or hand delivery to the designated contact persons of each party.

16. ACCEPTANCE & SIGNATURES

The undersigned hereby confirm that they have carefully read, reviewed, and fully understood the technical scope of work, commercial terms, and all provisions set forth in this proposal. The undersigned agree to be bound by the terms and conditions contained herein.
